*Redfield, SD; February 4, 2008--*Redfield Energy, LLC announced today that they have declared a \$0.10 per unit distribution for members of record as of October 31, 2007. Redfield Energy (RE) is a 50 MGY ethanol production facility located near Redfield, SD that became operational in April of 2007 employing 36 full time people. RE has over 600 members that hold approximately 20 million units.

Tom Branhan, CEO stated, "The RE employees with the assistance of the Glacial Lakes Energy, LLC management team, have worked diligently over the past year to make RE as profitable and efficient as possible. We are very pleased that after six months of operation we are able to return more than \$2 million to our members. That is impressive in today's challenging business climate."

Chairman of the Board, Ronald Frankenstein indicated, "The Board of Managers decided to provide a cash distribution of slightly over half of the net earnings for the period. In 2005, we raised the capital needed to build this facility and wanted to return as much as we could prudently give to those who made RE a reality. Our farmer investors have been receiving a strong return via the higher corn prices, but I know the other investors will welcome the \$0.10 cash per unit for our first six months of operation."

The distribution checks will be available to the membership at the annual meeting to be held at 1:00 pm on February 13 in the Redfield National Guard building. Redfield Energy, LLC will begin the trading of their units on February 14, 2008 through [agstocktrade.com](http://agstocktrade.com). For more information visit their website at [www.agstocktrade.com](http://www.agstocktrade.com) or call them at 1-800-859-3018 or attend the annual meeting and hear their presentation.
